

ما دام قلة في مظهره لم يمتدح
 - القليل من القليل - القليل من القليل
 في الزنك

I - Answers of Questions of the text: 40

- 1 - The processing of cotton
 - 2 - It is sown in the spring.
 - 3 - It develops creamy white flowers.
 - 4 - B. flave.
 - 5 - A. True. 6 - C. yearly
 - 7 - A. Connected & C. Seed
 - 8 - B. noun. 10 - C. at last
- $4 \times 10 = 40$

II - Definitions: 12

- mercerizing: three definitions
 during which fabric is treated with caustic soda solution of course swelling of fibres. This results in improved lustre, strength and dye affinity. Cotton is processed under tension.

dyeing: Cotton is an absorbent fibre, responds rapidly to colouring process. It is carried out in an aqueous direct dye by immersing the fibre in aqueous dye bath.

Singeing: It is designed to burn off the surface fibres from the fabric to produce smoothness.

bleaching: It improves whiteness by removing natural coloration and removing trace impurities from the cotton.

Scouring: It is a cleansing washing process carried out on cotton to remove natural wax and non-fibrous impurities.

III - composition: 12

III. Synthetic fibre

are the result of extensive development by scientists to improve upon the naturally occurring animal and plant fibres. In general, synthetic fibres are created by forcing or extruding through holes (called spinnerets).

Knitting by machine

It is done by different ways warp and weft. Weft is similar method of hand knitting where stitches are made. In warp there are pieces of yarn and vertical.

IV - Choosing the correct answers: 36

11- A. ourselves

12- C. were

13- A. whom

14- B. boils

15- B. who

16- A. is travelling

17- C. Saw

18- B. on

19- B. boils

$$4 \times 9 = 36$$
